Required water pressure : 1.5 - 3 bar (20 - 45 psi / 150-300kPa)

IRON: Iron is regulated via the drinking water ordinance with 0.2 mg/L

CHLORINE: Even small amounts of chlorine can lead to a change in taste

CARBONATE HARDNESS: Depending on the coffee; recommendation: individual tasting during set-up and subsequent fine-tuning of the filter blend, as the KH has the greatest influence.
